ART SPECIFICATIONS FOR ACCELERATE CONFERENCE PROMOTIONAL MATERIALS

Thank you for sending your artwork to us. Feel free to send us your final artwork or the individual elements so we can design it for you. When submitting your artwork, please follow these recommendations to help ensure the best quality of your promotional materials.

Printed Program

Artwork sizes:

Design Tips:

DOCUMENT

- Please create your document to the exact size it will print.
- On full-page ads, bleeds must extend a minimum of 1/8"(.125") past the trim.
- On full-page ads, please allow an 1/4" (.25") margin from the trim for text and images.

IMAGES

- All images should have a minimum resolution of 300 dpi at 100%. Please do not use LZW compression.
- All images should be converted to CMYK.
- All image files should be PSD, TIF, JPG or EPS. PICT and GIF files are low-resolution web files and are not suitable for printing.
- Do not copy and paste images from a program into a page layout program. Import or place the image

through the page layout program. Otherwise, your images may get lost.

- Please make sure the file extensions remain intact on all files. If they are changed or omitted, they are unrecognizable when transferred.

COLORS

- All art files should be converted to CMYK. We cannot guarantee color consistency for files that must be converted from Index, LAB or RGB color spaces to CMYK.

FONTS

- Use only postscript, open type and true type fonts.
- Be sure to supply the fonts for any artwork used in your document (if they are not already converted to outlines).

Looping Ad Slide

Widescreen
16:9 ratio

Looping ad slides will be showcased on large projection screens in the meeting space or on large television screens in the exhibit area. Both scenarios require the widescreen format.

Make sure your first step is **Design > Slide Size**. Set your PowerPoint or Keynote dimensions first! When you set the size of your slide as soon as you open the presentation, you won't clip or stretch your slides. This is the best way to avoid re-work while working with PowerPoint slide sizes.

Videos

Widescreen
16:9 ratio

DURATION

- Please ensure your video is 2 minutes or less in length.

PREFERRED FILE SETTINGS:

- Format: MP4
- Video codec: H.264 / AVC
- Audio codec: AAC
- Framerate: 30 FPS
- Aspect ratio: 16:9

Handling Your Files

For artwork related questions, please direct all art inquiries to the Baptist Resource Network's Communications Office at shannonb@brnunited.org or (800) 451-6599, ext. 14.

Sending your file(s):

- If under 10 mgs, email them to Shannon Baker at shannonb@brnunited.org.
- If over 10 mgs, feel free to use a service like wetransfer.com or dropbox.com to send your files.

If we design the art for you, you will need to submit various elements, such as logos, text, and related photographs or graphics. Once designed, we will send you a proof for your review before printing and/or airing. Please note: At this time, the Communications Office cannot produce videos for organizations outside of the Baptist Resource Network. Thank you!
